Session 92: Aspects to Consider When Working with Psychology

Starts recalling about information given in another session, about how inside the seed form parents to become a human, inside there is also the information about all creation. Apparently, there was a question about psychology and how to help. The entity says that the causes are to be looked for further back, not only environment but behind even hereditary factors. Importance of patterns.

It is about psychology. Views and advice to people working in that Field.

2nd question at 44:54
About when an individual has self-distrust. Talks about the Ego.

It ends abruptly.
